Research Interests

Computational Photography, Image Restoration, Diffusion Models, Reinforcement Learning, Physical Simulation

Toy Projects

- Autonomous Indoor Flight of Tello Drone using CrossFormer** Yonsei Drone Club
• Designed a vision-based indoor autonomous navigation system using the CrossFormer model.
• Contributed to data collection, inference code development, and test flights.
Reinforcement Learning for Snake Game Personal Project
• Built a reinforcement learning agent using PyTorch to learn the classic Snake game.
Real-Time Win Prediction for League of Legends Personal Project
• Collected match data using Riot Games API and built a win-rate prediction model.

Technical Skills

- **Languages:** Python (PyTorch, TensorFlow, JAX) — **Tools:** Git, Linux

Awards & Activities

- Encouragement Award, ROKAFA Future Aerospace Academic Conference, Nov. 2025
• 15th Place, Yonsei University Algorithm Programming Contest, 2023
